## Creating Value Each Step of the Way

For the homeowner, our products are long lasting and require very little maintenance. We can save builders time and money by designing install friendly products that are hard or impossible to do on site. Architects who have drawn specific details that can't and shouldn't be bought off a shelf now have a resource. Spend less time scratching your head and worrying about call backs, ask for us by name.

## Making the Parts that Define Your Building's Exterior

For us, “custom” means being able to serve a diverse clientele with a wide variety of needs. Listed below are some of the things we do regularly. If you have a project that involves something not listed, please ask your sales representative. You’ll be surprised to find out what we’ve already made.

- Square straight, tapered, or entased columns
- Oval, square, or arch top window surrounds
- Structural and decorative brackets
- Historic reproductions
- Railing assemblies
- Custom moldings
- Spiral handrails
- Window boxes
- Radius work
- CNC routing
- Pediments
- Pergolas
- Pilasters
- Shutters
- Corbels

## Sometimes It's What's on the Outside That Matters

We understand that each building has its own flavor and each person has their own taste. We can help create the building that matches your taste perfectly. Our products help preserve the architectural details of your building.

## Custom Millwork Services to Meet Your Needs

We've spent years transitioning from our traditional woodworking roots to a modern facility ready to meet the challenges of cutting edge materials. As we move forward with innovation, ingenuity and product development, we'll never lose sight of giving you a service-based customer experience. While we specialize in the use of cellular PVC we'll always point you in the right direction for the best material for your application. You can depend on us to deliver products that add value to your project by marrying beauty and performance.

“Most of our homes have very intricate, detailed, and demanding profiles of millwork and structure. Whitewood Millwork has been flawless in their execution of this work and continues to meet all of our needs conscientiously and professionally.”
